

III° Workshop

UVAR Box Project: Current Progress of Italian CCs

14:00-16:00 on September 20th, 2021

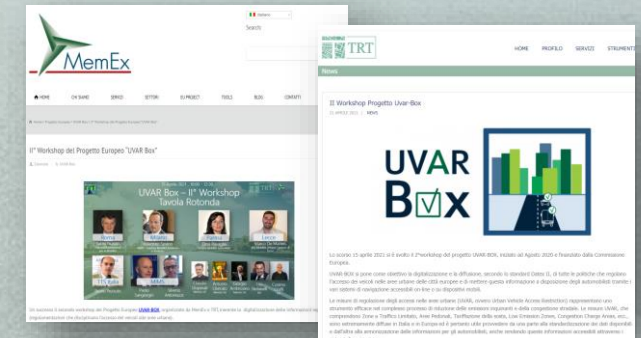

European Commission Directorate-General for Mobility and Transport

Italy CC – Successful II° Workshop held on last 15th April

- More than 40 attendees (with around 70% of Interest Rating)
- Several Authorities involved as speaker:
 - MIMS - Italian Transport Ministry (at high level)
 - TTS – Italia
 - Milano, Verona, Roma, Parma and Lecce Municipalities
- MIMS has underlined the importance of UVAR Box Project and the willing to support the Italian Country coaches (and the whole consortium if needed)
- Collected the availbilty by several municipalities to continue the collaboration
- Many positive feedbacks by participants after the workshop
- Video registration available: <https://youtu.be/BbpjMFNMUpE>
- Dissemination after workshop

1 LEZ/Emergency Scheme

Sicilia
1 LEZ/Emergency Scheme

The strategy envisages to reach the Responsible of the Regions with an high number of LEZ in order to be supported toward the Local Authorities (green colour in the picture).

For the others cases the Municipalities which have implemented a LEZ / Emergency Scheme / Winter LEZ will be contacted directly

We are working to be supported by the "Italian Ministry of Sustainable Infrastructures and Mobility"

Misure temporanee per il miglioramento della qualità dell'aria in caso di accumulo degli inquinanti

Per contrastare l'inquinamento atmosferico e migliorare la qualità dell'aria le Regioni Lombardia, Piemonte, Veneto e Emilia-Romagna hanno sottoscritto il 9 giugno 2017 un Accordo di programma con il Ministero dell'Ambiente per la realizzazione congiunta di una serie di misure additionali di risanamento.

Tra queste vi sono le misure temporanee da attivare in tutti i Comuni sopra i 30.000 abitanti e in quelli aderenti, al verificarsi di condizioni di perdurante accumulo e aumento delle concentrazioni degli inquinanti correlate a condizioni meteo sfavorevoli alla loro dispersione.

Si ricorda che, a prescindere dall'eventuale attivazione delle misure temporanee, sono in vigore le misure strutturali permanenti finalizzate alla riduzione delle emissioni inquinanti in atmosfera e al miglioramento della qualità dell'aria. Più info: [misure permanenti](#).

Per maggiori dettagli sulle misure temporanee e sulle misure permanenti è possibile consultare la pagina informativa disponibile al seguente link: [clicka qui](#).

Next steps

- **UVAR TOOL BOX presentation and training** (dedicated workshops, cities forum grouped by region, peer to peer meeting, etc.)
- **Data input** (based on different input mode) by cities UVAR responsible
- **Provision of DATEX II** model developed by UVAR Box consortium
- **Outputs and UVAR Box tool validation** from cities point of view

Many thanks for your attention
